

TC-MATRIX800

Fully Automatic Chemistry Analyzer

• 800 Tests / Hour, Double Reagent

For over 25 years, Teco Diagnostics has been an industry leader in the manufacturing of in-vitro clinical diagnostic tests and instruments. From powder to liquid clinical chemistry, we have high quality solutions for your diagnostic needs. Based in Anaheim, CA, our manufacturing facility is FDA regulated, and thus all phases of our production processes are based on strict Current Good Manufacturing Practices (cGMP) regulations which safeguard the excellent quality of all our products.

FDA Registered and cGMP Compliant Manufacturer ISO 13485.2016 Certified SA8000 Certified I CE

TC-MATRIX800

Fully Automatic Chemistry Analyzer

- Constant 800 test / hour with double reagent
- Double 90 reagent positions
- Automatic liquid level sensing, anti-collision protection.
- Multi wavelength simultaneous detection.
- New amorphous optical plastics reaction cups, perfect transmittance.
- Maintenance free water bath circulating heating system.
- Friendly surface and easy to operation

Multifunctional precision sampling probe

• 3 separate needle probes, The inner and outer of needles are automatically cleaned with acidic and alkaline cleaning solution to reduce cross contamination and ensure the accuracy of measurement data

• Dedicated sampling probe equipped with sensitive liquid sensor, timely feedback of reagent & sample residuals. Automatic adjustment of depth, intelligent collision protection, with automatic reset function

Excellent mixer design

- Two separate mixers, make the reaction liquid well mixed.
- Teflon coating mixers. No water dropping (reducing carry-over)
- Flat paddle method stirring, rotary washing
- Excellent mixing effect with standard mixing procedure

Reagent & sample tray

- 90 reagent positions
- 160 sample positions, micro cup & test tube blood collection can be used
- Non-stop cooling system, 24 hours 2°C -14°C
- Bar code reader (optional)

Reaction tray

- 160 reaction cuvettes
- Water circulation reagent cooling, Reaction volume as low as 150µl
- Stable & accurate temperature(37±0.1°C) for reaction
- 8-step automatic washing, clean thoroughly

Advanced operating system

- User friendly software interface simple, easy-to-operation
- Sample automatic dilution(decrease, increase, normal)
- Reaction result automatic checking and warning, calibration result automatic

checking, warning alarm log

- Linear & nonlinear calibration, Multi-points calibration up to 8 points
- Quality control apply to westgard, L-T plot, cumulative

Technical specifications

General information

General information		Mixing system	
Machine type	Random access, open reagent & locked reagent (optional)	Mixer	paddle-type mixing, effective reducing of carry-over
Test speed	Constant 800 tests/hour (Mono reagent or double reagent)		
Test principle	Colorimetric method, turbidimetry		
Test method	1 point end, 2 point end, Fixed-Time, Kinetics	Optical system	
Calibration type	Linear & nonlinear	Light source	Halogen lamp
		Wavelength	340-800nm, 12 wavelengths
		Absorbance range	0-4.0 Abs
Sample unit		Resolution	0.0001 Abs
Sample tray	160 sample positions		
Sample tube	Micro cup & Test tube & Blood collection tube can be used.	0	_
	(ø 12 -13)mm * (25 — 100)mm	Operation system Operation system	N Windows XP, Windows 7, Windows 8, Windows 10
Sample volume	2-30µl, step by 0.1µl	operation system	
Sample probe	Liquid surface detection, timely tracking for liquid volume.	Data processing	Automatic calibration, test combination, effective time management of reagents, serum index, whole process
	Collision avoidance		de-tection, linear expansion of enzyme, blank
Sample barcode	Sample barcode reader (optional)		deduction, dirty cuvette memory, cross infection
			prevention, patient information memory and association
			input, automatic report audit, data fuzzy query, report
Reagent unit			statistics and printing, reference range grading, alarm information classification, user operation privilege
Reagent tray	90 reagent positions, Refrigerator cooling system, 24 hours		classification management.
	2°C-14°C, open system	Report printing	6 formats optional, surpport custom pattern
Reagent volume	20-300µl, step by 1µl		
Reagent needle	Liquid surface detection, timely tracking for liquid volume.	Interface	TCP/IP network interface
	Collision avoidance.		
Regent barcode	Regent barcode reader (optional)		
		Working conditio	ns
		Power supply	AC 110/220V ± 10%, 50/60 Hz, 650W
Reaction unit		Water consumption	≤40L/hour(maximum)
Reaction tray	160 reaction cuvettes, new amorphous optical plastics	Dimension	1360mm • 810mm • 1180mm (L*W•H)
	reaction cups, perfect transmittance.	Weight	350kg
Reaction volume	150µl-330µl		
Reaction time	10 minutes		

Temperature Water circulation reagent cooling
